## Ice Cream Lunch

During lunch one day, the Lab staff succeeded in making ice cream using liquid nitrogen as the cooling medium. It worked great, even though we got a bit messy. To the right Matt poses with his make shift mixer, and below and to the left is the ice cream product.

Jamie and Mike use liquid nitrogen to make the ice cream, Matt and Nick also help out below

Matt and Amy working hard. With Gary and Olga below enjoying the fruits of their hard labor.

Nick is stirring the strawberry ice cream.

Matt stirring the peanut butter chocolate ice cream.

Matt and Nick working the cream.
